For Immediate Release

February, 2015

Micro Control Systems adds “GREEN DUAL-WAVE SOLDERING SYSTEM”

making us

Lead-free Soldering

The Dual-Wave soldering machine brings complete through-hole, surface mount and mixed-technology wave soldering capability to Micro Control Systems.

Capable of soldering 1,500 assemblies per 8-hour shift, the Dual-Wave includes as standard a number of advanced features, a self-cleaning titanium finger conveyor, spray fluxer, forced hot air convection pre-heat, and an energy-saving mode that conserves power and reduces dross formation.

RoHS Compliant

The Restriction of Hazardous Substances Directive 2002/95/EC, (RoHS 1), short for Directive on the restriction of the use of certain hazardous substances in electrical and electronic equipment, was adopted by the European Union.

RoHS is often referred to as the ‘lead-free directive’.

Many of the products we manufacture and sell will bear the RoHS Compliant Seal, showing our commitment to a “Green” environment.
