Part #
MCS-SHIELDWIRE-GROUNDING-KIT
(package of 2)

Description

MCS-SHIELDWIRE-GROUNDING multi-terminal splicing connector should be used on all 12 volt MAGNUM or MicroMag installations to safely ground the sensor drain shield wires to eliminate stray electrical current, thereby helping to reduce line noise from the sensors to the controller.

MCS-SHIELDWIRE-GROUNDING multi-terminal splicing connectors are a standard part of our Industrial Control Panel for grounding of the sensor drain shields.

When installing in an existing panel, confirm that there is a good earth ground in the panel prior to installing the shields.

Specifications

Kit Contains:

MCS-SHIELDWIRE-GROUNDING multi-terminal splicing connector with 9'- 16 awg wire with ring terminal.

Packaging

Package of 2
Shipping Weight..... 1 lb approx.

Drain Shields twisted to one wire
(two to three per connection)

MCS-SHIELDWIRE-GROUNDING
connected to Earth Ground
