

SOFTWARE RELEASE NOTES

MCS-CONNECT
Version 18.08.13
01/26/2017

Updates from previous versions:

New Features:

1. Added new state called "CHL STAGING OFF".
2. Added a new refrigerant called R448A and added the refrigerant to the PT Chart with appropriate values.
3. The Alarm Alerts menu item will now change depending of the state of the Alarm Alerts.
4. There is now a new pop up that will show when there is an Alarm. The pop will give the user 10 seconds to choose an option or the regular diagnostic save will occur.

Bug Fixes:

1. Improved multi-board communication in the graphics view.
2. It has also has a new surge line graph feature. The surge line graph is under the drop down of the Live Graph button.
3. Fixed the problem with changing the setpoints in status view.
4. Changed the Live Graph background color to grey to match the past history graph background.
5. Fixed the issue of screen freezing during serial scan.
6. Fixed the issue if an invalid config came up it caused the program to freeze.
7. When using the graph state the scroll bar will stay in the same location when there are new selections of what sensors to graph.
