SOFTWARE RELEASE NOTES

MCS-CONNECT
Version 9.20D
01/29/2013

Updates from previous versions: Includes 9.20C

New Features:

D

1. New code added with previous bug fix is still causing a NULL Pointer Exception when the user attempts to get authorized without first creating the status grids. Ex. Connecting to a Magnum by clicking the Graphics button instead of a tab. RESOLUTION – added a Boolean flag to mark when the System Service Panel has been created.

C

1. Beginning creating the Device type for "Big Mag V14".
2. Redesigned the Progress Bar Jframe to have an optional button in the frame that can be used as a Cancel button and be hidden in the case that it is not needed. Increased size of Font and edited text for better readability.
