

MCS Release Note

Product Type: MCS-Connect Software Revision: 19.01.13

Release Date: November 13, 2025

Release 19.01.13 - Thursday, November 13, 2025 Log:

- Bug Fix Major:
- Fixes table boundary update logic.
- BUGFIX MAJOR: Corrects the boundary conditions for table updates, ensuring that the `position` variable does not exceed the maximum allowed values (`numbSI`, `numbDO`, `numbAO`). This resolves an issue where the table update logic was not correctly handling the upper bounds, potentially leading to out-of-bounds errors or incorrect data display.
